

# Jergens®

MANUFACTURING EFFICIENCY

WORKHOLDING SOLUTIONS

SPECIALTY FASTENERS

LIFTING SOLUTIONS

## Quality Control for Safety's Sake

Our quality control procedures define the entire manufacturing process and provide complete traceability from raw materials, tested in our metallurgical lab, to finished product. Our state-of-the-art, 110,000 square foot facility is AS 9100 Rev D / ISO 9001:2015 Certified, and our center and side pull hoist rings are CE certified. Finally, all hoist rings conform to: (OSHA) 29 CFR 1918, ANSI/ASME B30.26, MIL-STD-1365C, MIL-STD-209K.

# Rugged American Made Quality

Jergens hoist rings are made the way they should be: right here in the USA, starting with domestically-produced, certified alloy steel. Choose Jergens and get tough, dependable, American-made quality every time. Period.

## Jergens, Inc. is a proud supplier to leading companies in the following industries:

- Transportation
- Military/Aviation
- Manufacturing
- Metalworking
- Material Handling
- Recreation
- Entertainment

View our Quality Certifications at  
[www.jergensinc.com/qualitycertifications](http://www.jergensinc.com/qualitycertifications)

## Company Information

### Jergens Company Profile

Jergens Inc. was founded in 1942 by Jack Schron, Sr. and his father Christy, to provide standard components for building jigs and fixtures. Today the fourth generation of family involvement continues stronger than ever. Throughout its 75-year history the company has grown into four separate operating divisions: Tooling Component Division (TCD), Jergens Industrial Supply (JIS), Acme Industrial Company (AIC), and Advanced Systems Group (ASG) Division of Jergens. While all divisions are vital to the Jergens family, the TCD Division is the centerpiece of our manufacturing capabilities. In June 1999, Jergens moved into a new 110,000 square foot facility and prides itself by manufacturing over 80% of its product offering, as well as setting the standard for producing the highest quality components in our industry.

Jergens Tooling Component Division comprises three distinct business units: Workholding Solutions, Lifting Solutions and Specialty Fasteners. Building on its reputation of uncompromising quality standards, Jergens is committed to helping its customers achieve leaner, more profitable manufacturing, and continues to add products and engineered solutions for an integrated approach to “Manufacturing Efficiency.”

Today, you'll find our tooling components, fasteners and hoist rings at work in just about every industry on every continent. And our innovative Quick Change Workholding Solutions like Ball Lock® Mounting System, Fixture-Pro® 5-Axis Workholding and Zero Point Systems have changed the way manufacturers worldwide think about productivity.

Jergens actively supports global, multinational and internationally based customers with metric dimensioned product offerings as well as many inch threaded products that are common in aerospace and industrial applications around the world. In important manufacturing markets in Canada, Europe, Asia and Latin America, Jergens representatives and stocking distributors have represented Jergens for more than 30 years. Our international representatives are trained technically on our products and provide expertise to customers and sub dealers in applying Jergens technologies to local industries. In recent years, two wholly owned affiliates were formed to serve the Chinese and Indian markets. Jergens (Shanghai) Commercial Co., Ltd, opened in 2006 and Jergens India Private Ltd., Navi Mumbai India opened in 2009. These fully registered trading subsidiaries employ trained multi-lingual engineers and commercial managers who provide marketing and importing, warehousing, distribution and technical support to our customers, distributors and local representatives.

Additionally, we offer a wide range of metalworking tools, clamps, and supplies to manufacturers in Northeastern Ohio, through our JIS Division. Acme Industrial, located in Carpentersville, Illinois, is a premium manufacturer of precision drill bushings and keylocking thread inserts. Our ASG Division specializes in products for light assembly ranging from torque-controlled electric screwdrivers to automation systems.

In addition to our unique product designs, we lead the industry with unparalleled customer service and delivery. Our website is a good example of our commitment to be the most innovative company in our industry. Customers and distributors can check stock and order on-line, view the Jergens catalog, and even download 2D, 3D and solid model CAD drawings in a variety of formats. Visit our website at [www.jergensinc.com](http://www.jergensinc.com) for the latest news and product information, as well as links to our other divisions. The Jergens family thanks you for your business.

### Distribution of Jergens Products

Jergens is proud to be represented by a network of qualified distributors throughout the world. If you do not know the name of the distributor nearest you, please call Jergens Customer Service at 1-877-486-1454 or visit [www.jergensinc.com/sales-rep-locator](http://www.jergensinc.com/sales-rep-locator).

### Quality Policy

Jergens, Inc. manufactures and supplies only *quality* products. Our quality system is AS 9100 Rev. D / ISO 9001:2015 Certified. Center-Pull and Side-Pull Hoist Rings are CE Certified. If there is a problem with any of our products, please contact your local Jergens Distributor or contact our Customer Service Department.

### Design Aids

Jergens, Inc. offers several CAD drawing formats for use in fixture design. Our Fixture Pro® software is available on CD. Our website ([www.jergensinc.com](http://www.jergensinc.com)) offers our complete catalog with hot links to CAD drawings on most of our products. We also offer 3D solid models of our products via the internet.

### Application Assistance

Jergens Inc. maintains a complete Technical Sales Department to work with you. Please feel free to call upon their knowledge and experience. Application videos are available for the Lift-Check™, Center-Pull Hoist Rings and various other products at [www.jergensinc.com](http://www.jergensinc.com) or [www.youtube.com/users/jergensinc](http://www.youtube.com/users/jergensinc).

### Engineering Changes

Product improvement is a continuing process at Jergens, Inc. Specifications and engineering data are subject to change without notice. **If current information is critical to your design, it is suggested that you contact the Jergens Customer Service Department, or download the most current drawing from our website\*, to verify any dimensions or specifications.**

### Bar Coding

Jergens' boxed and bagged products are fully bar coded for automatic identification. The bar code labels contain the ASCII Code 39 format, which was chosen as being suitable for most bar code readers. Jergens' bar codes will identify part numbers and manufacturer's codes.

### Specials

Jergens, Inc. will modify any item that is similar to our standard component parts. Please contact your Jergens Distributor with your request for a quote. Prints or sketches should be furnished if possible.

**Alloy Steel** - 4140 or equivalent

**Low Carbon Steel** - Free Machining 1215, 1018, or equivalent

**52100:** QQS-624

**Zinc Plate:** ASTM B633, Type V, VI, Class FE/ZN 5

**Cadmium Plate:** AMS-QQ-P-416, Class 3, Type 1

**Black Oxide:** MIL-DTL-13924 and AMS-2485

**Anodize:** per Mil. Spec. MIL-A-8625, Type II, Class 2 and AMS-2472

**Passivate:** AMS 2700

Alternate Finishes available upon request.

### Electroless Nickel Plating

**Envirolox:** AMS 2404, AMS-C-26074, Mil-C-26074

**Temp Range:** Max 400° F (204°C), min -20°F (-28°C) for Alloy Steel

**Magnetic Particle Inspection:** ASTM E1444

\* 3D Solid Models are available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)

## Engineer The Lift!!

- Jergens recommends the use of swiveling and pivoting hoist rings.
- Conventional eye bolts should be used for straight vertical lifts only.
- Are you using the proper hoist ring for the application?
- Is the hoist ring free to swivel and pivot? Any movement restrictions?
- Are lifting hole(s) in the proper location?
- Do you have the correct hole size for the hardware - safe lift capacity?
- Are the holes tapped deep enough to ensure full thread engagement?  
(See figure #3 on Installation Information; page 6.)
- Recommended thread depth:  
Steel – 1-1/2 times the bolt diameter (min.)  
Aluminum – 2 times the bolt diameter (min.)
- **RULE OF THUMB, IF IN DOUBT – DON'T!!!**

## Applied Load Changes With Sling Angle

Jergens swivelling hoist rings are designed and rated to be pulled at any angle at the rated load. However, the applied load on a multipoint lift will increase if the sling angle is less than 90°. So be sure to consider the sling angle when selecting lifting equipment. See illustration below.

### Sample Calculation:

### DO'S

1. Observe working load limitations (be especially careful with eyebolts used for angle lifts – see sling angle chart).
2. Visually inspect hoist ring prior to use.
3. Fully tighten hoist ring to recommended torque. Full thread engagement is required (no space between swivel bushing and lift).
4. Ensure proper thread depth - do not shim.
5. Make sure hoist rings have free travel - it must swivel and pivot without restrictions.
6. When installing in soft metal, such as aluminum, the minimum effective thread engagement should be two times the diameter of the thread (1-1/2 times bolt diameter – steel).

### DON'TS

1. Never pull a Center Pull Style hoist ring bar from the side.
2. Never use an oversized hook in eyebolts or hoist rings (See figure #1 on Installation Information; page 6).
3. Never use excessive sling angle.
4. Never steam clean or degrease hoist rings (could cause rusting and binding).
5. Never apply shock loads.
6. Never allow the side of a hoist ring to make contact with the lift. (See figure #2 on Installation Information; page 6.)
7. Never alter hoist rings.

## Installation Information

Select the proper Hoist Ring for the job. Do not attempt to apply more than the rated load capacity. *The load capacity is marked on the Hoist Ring.*

Drill and tap the workpiece so that the hoist ring bolt is installed perpendicular to the surface of the workpiece. Countersink the tapped hole to prevent “swelling” of the top thread when the hoist ring bolt is torqued. The workpiece surface must be flat, providing complete contact for the hoist ring bushing.

Do not use spacers between the hoist ring bushing and the workpiece surface.

When installing in soft metal, such as aluminum, the minimum effective thread engagement should be two times the diameter of the thread. When installing in steel, thread engagement should be 1-1/2 times the thread diameter.

Load rating may be reduced if parent material is under 80,000 PSI ultimate tensile strength.

Always *tighten the bolt to the proper torque value*, which is stamped on the Hoist Ring.

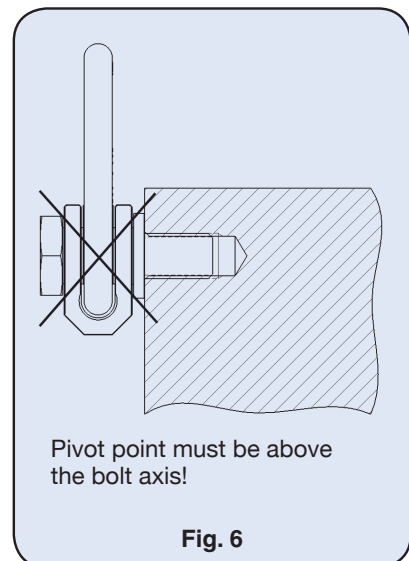

Loosening of the *bolt* may develop during use. *Re-tightening to the required torque must be done whenever the bolt loosens.* The proper tightening torque is stamped on the Hoist Ring.

When lifting, apply force gradually. **DO NOT APPLY SHOCK LOADS.**

For through-hole applications, be sure that nut/washer are the same quality grade as the Hoist Ring.

**Periodic visual inspection and pull testing is recommended as damage can occur from improper usage.**

**Always read and understand safety and installation information supplied with each Hoist Ring.**

## Shackle-Lok™ Shackle Style

Shackle-Lok™ combines the strength of a hoist ring with the versatility of a shackle. Its unique, 3-piece design is ideal for use with a variety of lift methods, and shackles are interchangeable. Shackle-Lok™ is simply the industry's most efficient below-the-hook lifting device from a weight to load rating ratio.

The Shackle-Lok™ was designed to work with numerous thread sizes. Any straight thread size, pitch, or length can be manufactured to meet application needs.

- Internal ball bearings allow for smooth rotation under load
- Full 360° swivel and 180° pivot action
- Easy to remove shackle
- Rated 5:1 strength factor in vertical pull. For other than vertical pull, reduce rated load by 30%
- Material: alloy steel
- Bolt and base finish: black oxide
- Bolt and base are magnetic particle inspected
- Shackle finish: zinc plated with gold colored conversion coating
- Proof tested to 200% of rated load capacity
- Certificate of proof test provided
- 3D Solid models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)
- Temp range -20°F to 400°F

<sup>1</sup> Stated load capacity based on recommended thread torques as shown in chart.

<sup>2</sup> It is recommended that these torques be used when installing hoist rings.

**Shackle Material:** Carbon Steel

**Shackle Type:** IV A, Grade A, Class 2

**Note:** When tightening the bolt, the shackle and pin must be removed.

Not intended for prolonged rotation

## Lift-Check™ Center Pull Style

LIFTING SOLUTIONS

The Jergens Lift-Check™ hoist ring assures that your application is secure and ready to lift. The Lift-Check™ is comprised of a Jergens' patented proprietary hex head cap screw which integrates the Visual Tension Indicator.

Patented Lift-Check™ Center Pull and Forged Style Hoist Rings are rated at 5:1 strength Factor & Proof tested to 200% of rated load capacity, certificate of proof test provided, in accordance with ASME B30.26. Visual Tension Indicator confirms engagement – clearly illustrates whether bolt joint is loose or tight. Ensures safety and provides accuracy of +/- 10% of designed tension. Hands-free inspection at a distance, prior to the lift. Reduces installation time. No torque wrench or calibration needed. Lift-Check™ bolts are reusable and provide reliable visual indication of joint clamping force. Bolt kits available for Jergens hoist ring upgrades.

- **Material:** Alloy Steel
- **Finish:** Black Oxide
- **Washer:** Zinc Plated with Yellow Chromate Coating (Inch), Clear/Blue Conversion Coating (Metric)
- **U-bar, Bolt, Pins, Base, Washer and Bushing** Magnetic Particle Inspected
- **Rated at 5:1 Strength Factor**
- **Full 360° Swivel and 180° Pivot**
- **Conforms to ASME B30.26 and Mil-STD-209K**
- **Temperature variations may apply (-20°C to 75°C / -4°F to 168°F)**
- **No torque wrench or calibration required, thus reducing installation time**
- **The Lift-Check™ hoist ring visual tension indicator confirms engagement—clearly illustrates whether the bolted joint is loose or tight**
- **Hands-free inspection at a distance, prior to the lift**
- **Proof Tested to 200% of rated load capacity**
- **Available in inch and metric sizes**

## Lift-Check™ Open Bail Forged Style

Visual Tension Indication System (VTIS) quickly ensures the load is secure and ready to lift. Lifting and moving heavy loads is critical operation, both for the load and worker safety. Make Lift-Check™ a part of your OSHA-approved lifting plan.

Patented Lift-Check™ Center Pull and Forged Style Hoist Rings are rated at 5:1 strength Factor & Proof tested to 200% of rated load capacity, certificate of proof test provided, in accordance with ASME B30.26. Visual Tension Indicator confirms engagement – clearly illustrates whether bolt joint is loose or tight. Ensures safety and provides accuracy of +/- 10% of designed tension. Hands-free inspection at a distance, prior to the lift. Reduces installation time. No torque wrench or calibration needed. Lift-Check™ bolts are reusable and provide reliable visual indication of joint clamping force. Bolt kits available for Jergens hoist ring upgrades.

- **Material: Alloy Steel**
- **Finish: Black Oxide**
- **Washer: Zinc Plated with Yellow Chromate Coating (Inch), Clear/Blue Conversion Coating (Metric)**
- **U-bar, Bolt, Base, Washer and Bushing Magnetic Particle Inspected**
- **Rated at 5:1 Strength Factor**
- **Full 360° Swivel and 180° Pivot**
- **Conforms to ASME B30.26 and Mil-STD-209K**
- **Temperature variations may apply (-20°C to 75°C / -4°F to 168°F)**
- **No torque wrench or calibration required, thus reducing installation time**
- **The Lift-Check™ hoist ring visual tension indicator confirms engagement—clearly illustrates whether the bolted joint is loose or tight**
- **Hands-free inspection at a distance, prior to the lift**
- **Proof Tested to 200% of rated load capacity**
- **Available in inch and metric sizes**

## Lift Check™ SP2000™ Side-Pull Style

RED INDICATES  
LOOSE

BLACK INDICATES  
TIGHT

The Jergens SP2000™, Patented Lift Check™, Side-Pull Style Hoist Ring is ideal for flipping fixtures, dies and molds. The hoist ring is low profile and has a unique bolt retention design. The oversized forged bale easily adapts to larger hoist hooks. Its relatively light weight makes it easier to handle. This hoist ring assures that your application is secure and ready to lift. The Lift-Check™ is comprised of a Jergens' patented proprietary hex head cap screw which integrates the Visual Tension Indicator which confirms engagement – clearly illustrates whether bolt joint is loose or tight.

- **Material:** Alloy Steel
- **Finish:** Black Oxide
- **Washer:** Zinc Plated with Yellow Chromate Coating (Inch), Clear/Blue Conversion Coating (Metric)
- **Bail, Bolt, U-Channel, Spacer and Bushing** are Magnetic Particle Inspected
- **Rated at 5:1 Strength Factor**
- **Full 360° Swivel and 180° Pivot**
- **Conforms to ASME B30.26 and Mil-STD-209K**
- **Temperature variations may apply (-20°C to 75°C / -4°F to 168°F)**
- **No torque wrench or calibration required, thus reducing installation time**
- **The Lift-Check™ hoist ring visual tension indicator confirms engagement—clearly illustrates whether the bolted joint is loose or tight**
- **Hands-free inspection at a distance, prior to the lift**
- **Proof Tested to 200% of rated load capacity**
- **Available in inch and metric sizes**

## Envirolox™ Protective Finish

The Envirolox™ Protective Finish is a *proprietary nickel based coating that helps to prevent rusting and other environmental hazards from affecting Jergens Hoist Rings.* This coating does not contain cadmium or chromium, is *environmentally friendly*, and is proven to be *effective in extreme conditions*. It provides surface hardness, lubricity and more effective corrosion protection than paints. Envirolox™ Protective Finish is available on Jergens Center-Pull and Side-Pull Style Hoist Rings. It is not recommended for the Swivel Eyebolt or the SP 2000 products.

- Available on Center-Pull and Side-Pull Traditional Style (See pages 16-17 and 23 for part numbers.)
- Available upon request for other selected Jergens lifting products.
- Added resistance to rusting.
- Environmentally safe.

## Hoist Ring Hold Down Clips

Two or more Hoist Ring Hold Down Clips should be used to prevent ring movement when the hoist ring is not in use. These simple spring steel clips prevent ring movement, provide an additional safety feature when used around machine tools and give a neat finished appearance.

- Material: Spring, Steel
- Finish: Cadmium or Zinc

## Center-Pull Traditional Style

†Square Base

- Full 360° Swivel and 180° Pivot Action
- Rated at 5:1 Strength Factor
- Material: Alloy Steel
- Finish: Black Oxide (Except Washer)
- U-Bar, Bolt, Pins, Base, Washer and Bushing are Magnetic Particle Inspected
- Washer: Zinc Plated with Gold Colored (Inch), Clear/Blue (Metric) Conversion Coating
- Proof Tested to 200% of Rated Load Capacity
- Certificate of Proof Test provided (See sample on page 35)
- 3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)
- Available with Envirolox™ protective finish See page 14 for more information
- Conforms to ASME B30.26 and MIL-STD-209K

## Open Bail Forged Center Pull Style

For a better value in a domestically forged, high strength, alloy steel hoist ring, Jergens Lifting Solutions introduces our NEW Forged Center Pull Hoist Rings. Its compact construction, high quality and safety features delivers tremendous value in the field. Forged Hoist Rings are ideal for OEM and Industrial use.

- Full 360° Swivel and 180° Pivot Action
- Rated at 5:1 Strength Factor
- Material: Alloy Steel
- Finish: Black Oxide (Except Washer)
- Available in Inch and Metric sizes
- Washer: Zinc Plated With Yellow Chromate Coating (Inch), Clear/Blue Conversion Coating (Metric)
- Magnetic Particle Inspected
- Proof Tested to 200% of Rated Load Capacity
- Certificate of Proof Test Provided
- Multi-Lingual Installation Sheet
- 3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)
- Conforms to ASME B30.26 and MIL-STD-209K
- CE Certified

## Closed Bail Forged Center Pull Style

U.S. Patent No. 6,652,012

Our Forged Center Pull Hoist Ring integrates a solid center brace lift bail into our most popular style product. This design eliminates the possibility of spreading the lift ring in misapplications. Forged hoist rings are ideal for OEM and industrial use.

- **Material: Alloy Steel**
- **Full (over center) 360° swivel and 180° pivot action**
- **Capacities up to 30,000 lbs.**
- **Inch and metric**
- **5:1 strength factor**
- **Proof tested to 200% of rated load capacity**
- **Available in 17-4PH Stainless Steel (up to 5,000 lbs/2,150 kgs.) See page 22**
- **Made in U.S.A.**
- **3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)**
- **400°F (204°C) to -20°F (-28°C)**
- **Magnetic particle inspected**
- **Replaces Stationary Eyebolt**
- **Lifting Tooling Columns & Large Fixtures**
- **OEM Applications**
- **Lifting Die & Molds**

## Closed Bail Forged Center Pull Style Stainless Steel

Our Forged Center Pull Hoist Ring integrates a solid center brace lift bail into our most popular style product. This design eliminates the possibility of spreading the lift ring in misapplications. Forged hoist rings are ideal for OEM and industrial use.

U.S. Patent No. 6,652,012

- **Material: 17-4PH**
- **Same strength/load capacity as steel**
- **Full (over center) 360° swivel and 180° pivot action**
- **Capacities up to 5,000 lbs.**
- **Inch and metric**
- **5:1 strength factor**
- **Proof tested to 200% of rated load capacity**
- **Maximum operating temperature 800°F Intermittent, 600°F continuous**
- **Made in U.S.A.**
- **3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)**
- **Magnetic particle inspected**

## Side-Pull Traditional Style Precision Cast Body

- Rated at 5:1 Strength Factor
- Material: Alloy Steel
- Clevis, Ring, Bushing and Cap Screw are magnetic particle inspected
- Clevis is X-rayed
- Finish: Black Oxide
- Proof Tested to 200% of Rated Load Capacity
- 3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)
- Available with Envirolox™ protective finish See page 14 for more information
- Made in USA
- 400°F (204°C) to -20°F (-28°C)

360° swivel plus pivot point moves around bolt to provide greater clearances in side lifting and when lifting rotating objects.

<sup>2</sup>It is recommended that these torques be used when installing hoist rings.

## SP 2000™ Side-Pull Style

The Jergens SP2000 Side-Pull Style Hoist Ring is ideal for flipping fixtures, dies and molds. It swivels 360° and pivots around the center bolt providing the ring with greater clearances in side lifting applications and when lifting rotating objects. The hoist ring is low profile and has a unique bolt retention design. The oversized forged ring, and single piece forging, easily adapts to larger hoist hooks. Its relatively light weight makes it easier to handle than similar hoist rings and the installation is conveniently done with external wrenching (47531, 47532) or internal/external wrenching (all other sizes). All parts are made in the U.S.A.

Patent Nos. 6,068,310  
and 409, 895

- **Can Be Used for Top Lifting as well as side lifting applications**
- **Full Swivel & Pivot Action**
- **Rated at 5:1 strength factor at any angle**
- **Material: Alloy Steel**
- **Finish: Black Oxide**
- **Proof Tested to 200% of Rated Load Capacity**
- **3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)**
- **Made in USA**
- **400°F (204°C) to -20°F (-28°C)**
- **Magnetic particle inspected**

## Side Swivel Style

U.S. Patent No. 6,443,514

Jergens new Side Swivel™ Lifting Ring is designed specifically for OEM type applications. It replaces potentially dangerous eyebolts on commercial, military, and industrial lifts requiring full swivel and pivoting action.

- 5:1 strength factor
- Unique 3 piece design
- Made in U.S.A.
- Capacities up to 4100 lbs.
- Inch and metric
- OEM Pricing
- 3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)
- Material: Alloy Steel
- 400°F (204°C) to -20°F (-28°C)
- Magnetic particle inspected

Ideally suited for OEM applications

## Swivel Eyebolt

The Jergens Swivel Eyebolt™ lifting product has a full swivel and pivoting action that allows for the flipping and turning of the part without unhooking. The patented tamper resistant design is ideal for permanent mounting on OEM applications or on molds, dies and fixtures.

- **Tamper Resistant Design**
- **Swivels 360°, Pivots 180°**
- **Eliminates Bending (of Eyebolt) Problem**
- **Forged, Oversized, One-Piece Lift Ring**
- **Rated at 5:1 Strength Factor**
- **Load Capacities to 4000 Lbs/2000 Kg**
- **Economically Priced**
- **Material: Alloy Steel, or 316 Stainless Steel**
- **Finish: Black Oxide, or Passivated (SS)**
- **3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)**
- **Made in USA**
- **Magnetic particle inspected**

U.S. Patent Nos. 5,634,734  
 and 5,743,576  
 Foreign Patent Pending

## Pivoting Lift Ring

The Jergens Pivoting Lift Ring is a low profile lifting device that pivots 180°. It is one of the most economical lifting devices available and is ideal for applications that do not require a swivel action. This Lift Ring is easy to install and is available in five sizes. Load ratings range from 2,000 - 20,000 lbs. The product is manufactured from alloy steel, heat treated and magnafluxed.

- **Base: Precision Machined Alloy Steel**
- **Ring: Alloy Steel forging, heat treated, magnafluxed and certified**
- **Finish: Black Oxide**
- **Rated at 6:1 Strength Factor**
- **3D Solid Models available in multiple formats from [www.jergensinc.com](http://www.jergensinc.com)**
- **Made in USA**

- Stated load capacity with SHCS per ASTM A574/A574M

## Pivoting Lift Rings

# Shoulder Eye Bolts

- Material: C-1030 Forge
- Finish: Mill
- Thread: 2A
- ASME B 18.15
- Rated at 5:1 strength factor
- Recommended for vertical loads ONLY
- Temperature range: 30°F to 275°F

For other than vertical loads, general practice is to use 60% of the working load capacity for a load 30° from vertical; 33% of vertical load for load 45° from vertical; and 20% of vertical load for load 90° from vertical.

NOTE: 2 1/2 threads runout on threaded portion.

12	560	11.92	11.96	14.27	10	1.5	12.1	12.0
16	630	15.92	15.96	19.00	14	1.5	16.1	16.0

\*Dimensions in millimeters

### Kwik-Lok® Lifting Pin - Inches

Dia.	Grip Length							
	0.50	0.75	1.00	1.25	1.50	2.00	2.50	3.00
1/4	807216	807217	807218	807219	807220	807222	807224	807225
5/16	807232	807233	807234	807235	807236	807238	807240	807241
3/8	807248	807249	807250	807251	807252	807254	807256	807257
1/2	807280	807281	807282	807283	807284	807286	807288	807289
5/8	807312	807313	807314	807315	807316	807318	807320	807321

### Kwik-Lok® Lifting Pin - Metric

Dia.	Grip Length							
	15	20	25	30	35	40	50	75
10	857237	857238	857239	857240	857299	857241	857242	857307
12	857249	857250	857251	857252	857300	857253	857254	857308
16	857261	857262	857263	857264	857301	857265	857266	857309

**Important:** Please review all operating instructions that are included in the packaging or online before use.

**Note:** If the required hole size cannot be achieved; Jergens recommends the use of our threaded receptacle (see page 32); Please Contact Customer Service with any questions.

\*Lifting load ratings are based on tests with hardened tool steel plates or shoulder bushings. Load ratings may be reduced if oversized holes or parent material under 80,000 psi tensile are used.

\*Kwik-Lok® Lifting Pins are not suited for continuous rotation under load.

## Threaded Receptacles

High Strength Stainless Steel, 17-4 PH heat treated

### KLP Threaded Receptacles - Inch

For Kwik-Lok® Lifting Pin		Use Receptacle Part Number	Thread Size A	Overall Length B	Head Height C	Head Flats D	Diameter E	Install Torque (ft. lbs)
Size	Part Number							
1/4x0.5	807216	845100	1/2-13	0.930	0.16	.62	.75	7
5/16x0.5	807232	845101	3/4-10	1.100	0.28	.87	1.12	18
3/8x0.5	807248	845102	3/4-10	1.100	0.28	.87	1.12	25
1/2x0.5	807280	845103	1 1/8-7	1.625	0.37	1.25	1.62	47
5/8x0.5	807312	845104	1 1/8-7	1.625	0.37	1.25	1.62	53

### KLP Threaded Receptacles - Metric

For Kwik-Lok® Lifting Pin		Use Receptacle Part Number	Thread Size A	Overall Length B	Head Height C	Head Flats D	Diameter E	Install Torque (Nm)
Size	Part Number							
10x15	857237	855100	M20x2.5	29	7	26	34.8	35
12x15	857249	855101	M22x2.5	37	9	30	34.8	49
16x15	857261	855102	M27x3	41	10	32	41.2	68

### Kwik-Lok® Lifting Pin Kits - Inch

Kit Part Number	Kwik-Lok® Lifting Pin Size	Receptacle Thread Size	Kwik-Lok® Lifting Pin Part Number	Threaded Receptacle Part Number
847216	1/4 x 0.5	1/2-13	807216	845100
847232	5/16 x 0.5	3/4-10	807232	845101
847248	3/8 x 0.5	3/4-10	807248	845102
847280	1/2 x 0.5	1 1/8-7	807280	845103
847312	5/8 x 0.5	1 1/8-7	807312	845104

\*Each kit contains one Kwik-Lok® lifting pin and one corresponding Threaded Receptacle.

### Kwik-Lok® Lifting Pin Kits - Metric

Kit Part Number	Kwik-Lok® Lifting Pin Size	Receptacle Thread Size	Kwik-Lok® Lifting Pin Part Number	Threaded Receptacle Part Number
877237	M10 x 15	M20 x 2.5	857237	855100
877249	M12 x 15	M22 x 2.5	857249	855101
877261	M16 x 15	M27 x 3	857261	855102

\*Each kit contains one Kwik-Lok® lifting pin and one corresponding Threaded Receptacle.

## Quality Standards Center-Pull and Side-Pull Style Hoist Rings

### Load Bearing Member Components

- All material is domestically manufactured certified alloy steel.
- All components are machined prior to manufacture to remove any surface defects.
- All components are heat treated and certified to manufacturing specifications.
- Bolts are:

Inch	Thread Class	Metric	Metric Thread Class
Socket Screw Grade	Up to 1" 3A	Class 12.9	Class 6g
Tensile Strength	Over 1" 2A	Tensile Strength	
-180,000 psi - 1/2" or Smaller		-1220 MPa	
-170,000 psi - Over 1/2"		- (177,000 psi)	
100% Magnetic Particle		100% Magnetic Particle	
Inspected to ASTM E709-15		Inspected to ASTM E709-15	
& ASTM A574		& ASTM A574M	

- All other load bearing components are magnetic particle inspected based upon ASTM E709-15 and MIL-STD-1916 with zero defects permissible.
- Bolt torque and hoist ring load limit permanently marked on washer.
- AS 9100 Rev D / ISO 9001:2015 Certified.

### Individual certificate of proof-test accompanies Center-Pull and Side-Pull Style hoist rings in final packaging.

(1) Distinguishing Mark	(2) Description of Item Tested	(3) Quantity Tested	(4) Date Tested	(5) Load Applied	(6) Rated Load
TA	23411	1	08/07/2019	5,000 LBS	2500 LBS
	HOIST RING				

(7) Name and Address of Supplier:	Jergens Inc., 15700 Waterloo Rd., Cleveland, OH 44110
(8) Name and Address of Company performing test:	Jergens Inc., 15700 Waterloo Rd., Cleveland, OH 44110
(9) Position of Signatory in Company:	Quality Assurance Supervisor

We hereby certify that Jergens Inc. test procedure requires all hoist rings to be proof tested and examined; and that this form is evidence that the test operator completed all procedures as required.

Jergens Inc. certifies that all hoist rings have been proof tested and examined in accordance with Jergens QSWI 3.10 and that this test completes all procedures as required.

(Signature) *Sean Shaeterson*

In substantial agreement with (OSHA) 29 CFR 1918, ANSI/ASME B30.26, MIL-STD-1365C, MIL-STD-209K

## Quality Standards For Center-Pull and Side-Pull Style Hoist Rings

### Assembly Data

- Traditional Center Pull and Side Pull hoist ring assemblies are pull-tested and certified to 200% of rated load capacity and stamped with identifying date code.
- All hoist rings are designed for 5:1 strength factor.
- Hoist rings are color coded for easy identification: gold washer denotes inch sizes, silver/clear blue washer denotes metric sizes.
- Finished assembly is black oxide (with the exception of the washer).
- The Jergens name or logo is prominently displayed on assembly for identification of original manufacturer.
- Special plating or marking is available upon customer's request.
- Proper warning label is affixed to each clevis.
- Proof load testing, magnafluxing and heat treating are on file at Jergens, Inc.
- Material Certs available for nominal cost and must be requested with initial order.
- The finished hoist ring product is individually boxed.

NOTE: Specifications for side pull style hoist rings are identical to center pull style with the exception that the clevis is of precision cast alloy material which is serialized and conforms to X-ray specifications.

Contact Jergens for quality standards on all other lifting products.

Multi-lingual safety data instructions included in each package

# We Are Jergens

## WORKHOLDING SOLUTIONS

### SUPPORT, LOCATE AND HOLD:

From standard components to vises and quick change fixture systems like Ball Lock®, ZPS and Fixture-Pro® Multi-Axis.

## SPECIALTY FASTENERS

### FASTEN, STRENGTHEN AND SECURE:

From threaded inserts and toggle clamps to Kwik-Lok® Pins.

## LIFTING SOLUTIONS

### LIFT, TURN AND TRACK:

From chain sling and eye bolts to hoist rings and our proprietary Lift-Check™ hoist rings.

We got our start back in 1942, manufacturing tooling components to help American manufacturers operate quickly and more efficiently. “The Standard Components with the Highest Standards:” This founding philosophy put Jergens on the forefront of the “lean manufacturing” movement before anyone even thought to put those two words together.

In the years since, Jergens has structured its offering to advance the cause of leaner manufacturing, adding products and engineered solutions for an integrated approach to “Manufacturing Efficiency.”

You can find Jergens products just about anywhere in the manufacturing environment.
